

StormWater Management Guidelines:

<u>Area Disturbed During Construction:</u>		<u>Action:</u>
0 to 250 s.f.	=	None
250 s.f. to 5000 s.f.	=	Waiver
5000 s.f. to 1 acre	=	City SWPPP
1 acre and more	=	State SWPPP

Requirements for Each Action:

Waiver- Description of project, site plan showing stockpile locations, buffer areas, and possible sediment and erosion control measures, if necessary.

City SWPPP- Description of project, site plan showing existing and post-construction information, stockpile locations, sediment and erosion control measures, concrete washout areas, contours, grades, and possibly more depending on the location and magnitude of the construction project(at the discretion of the Engineering Dept.).

State SWPPP- See North Dakota Dept. of Health website for application and necessary forms. Formal SWPPP will be required showing everything listed above in the “City SWPPP,” as well as pre-construction and post-construction runoff calculations. All information is submitted to and approved by the NDDOH and the City of Jamestown. The City requires a copy for its files. For more information, the website is <http://www.ndhealth.gov/WQ/Storm/Construction/ConstructionHome.htm>
